1. It is noted that this application is now being handled by a different examiner, as set forth at the end of this Office action.

2. The Office action mailed 05/28/97 is hereby withdrawn, as it did not take into account the claims added in the supplemental preliminary amendment filed 04/21/97. Upon proper renumbering of the claims, the pending claims are 49-156.

3. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 49-84, drawn to methods of sequencing by hybridization.

Group II, claim(s) 85-96, drawn to kits comprising a chip, solutions of labeled probes, and a ligating agent.

Group III, claim(s) 97-126, 153, and 154, drawn to a sequencing chip plate and a method of making thereof comprising the use of wells.

Group IV, claim(s) 127-152, drawn to a sequencing microchip and a method of making thereof.

Group V, claim(s) 155 and 156, drawn to a method of making a sequencing chip comprising applying a material resistant to liquid flow.

Art Unit: 1637

The inventions listed as Groups I-V do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: each of the Groups has its own special technical feature which is not shared with any of the others; Group I relates to methods of sequencing by hybridization; Group II relates to a kit comprising a specific combination of reagent components; Group III relates to a sequencing chip plate; Group IV relates to a sequencing microchip; and Group V relates to a method comprising applying a material resistant to liquid flow in the making of a sequencing chip. Thus, there is no special technical feature common among the Groups.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kenneth R. Horlick whose telephone number is 571-272-0784. The examiner can normally be reached on Monday-Thursday 6:30AM-5:00 PM.
